Practice Emphasis

With a pre-law educational and work history in the natural resource and environmental science fields, Lloyd Landreth has practiced exclusively in the environmental regulatory and litigation area since 1986.

Clients & Matters

Mr. Landreth's clients include oil and gas exploration, production and transportation companies (including petrochemical subsidiaries), waste disposal companies, domestic and international airlines, airline fuel consortiums, electric and gas utilities, Indian tribes and a variety of industrial clients.

Mr. Landreth has extensive experience with environmental actions brought nationwide under federal statutory schemes such as CERCLA, RCRA, CWA, NEPA, CAA and state equivalents thereto, as well as common law claims. Mr. Landreth has been involved in defending clients against regulatory agency and private party claims for cost recovery and in pursuing cost recovery actions on behalf of clients against private parties and government agencies related to alleged soil, surface water and groundwater pollution. Mr. Landreth has worked extensively with environmental consulting firms on the technical and legal aspects of environmental claims associated with a variety of affected media (air, soils, sediments, surface and groundwater) including alternatives associated with risk-based cleanup requirements. Mr. Landreth has worked on a variety of environmental matters for Indian tribes and has been involved in numerous water right transactions.

Representative past and current matters include:

- Defense and prosecution of claims related to historic and current saltwater and petroleum hydrocarbon pollution at E&P and midstream facilities on behalf of oil and gas producers
- Development of natural resource damage claims for federal agencies against PRPs and defense of federal and state claims for natural resource damages on mining, landfill, oil and gas E&P and estuary sites
- Negotiation and development of environmental agreements with private parties, state and municipal authorities and management of risk-based cleanup activities associated with upgrade and expansion of a jet fueling systems at airports and negotiation of lease terms
- Defense of federal citizen suit environmental claims against airlines and oil companies associated with terminal, hydrant, refining and pipeline facilities
- Defense of and enforcement of indemnification obligations associated with environmental claims at industrial, energy and commercial facilities
- Transactions on behalf of developers for securing groundwater and surface water rights and valuation of water rights
- Representation of E&P companies on NEPA issues related to oil and gas projects
- Representation of Indian tribes on various environmental and natural resource matters
- Administrative litigation regarding NEPA issues on federal lands.
